PROFESSIONAL SUMMARY

UI/UX Designer with 4+ years of experience working on AI products, SaaS platforms, and enterprise tools. I've shipped products used by clients in the US, UK, and India, built design systems from scratch, and spent a lot of time figuring out how to make complex AI workflows feel simple for the people actually using them. I work closely with engineers and data scientists, and I'm comfortable owning design on my own when a team needs to move fast without dropping quality.

CORE SKILLS

Product Design • User Experience Design • User Interface Design • AI Product Design • Human-AI Interaction • Conversational & Agentic UX • Design Systems • UX Research • Rapid Prototyping & MVP Design • Interaction Design • Information Architecture • Usability Testing • Accessibility

TOOLS

Design & Prototyping: Figma, FigJam, Framer, Sketch, Adobe XD, Adobe Illustrator, Miro

AI Tools: Claude, ChatGPT, Cursor, GitHub Copilot, v0, Lovable, Midjourney, Runway, Notion AI, Perplexity

WORK EXPERIENCE

Founding UI/UX Designer

December 2024 – June 2026

OverseeAI — Mumbai, Maharashtra

- As the only designer, took an AI insurance product 0→1 — from the first rough idea and wireframes all the way to launch. It's now live with a US insurance company client, where 95% of onboarded staff use it daily.
- Designed the conversational AI interface and the decision-support dashboards, with a focus on making the AI's outputs clear and trustworthy for insurance staff who aren't technical.
- Worked directly with data scientists, ML engineers, and insurance domain experts to map out the policy and claims lifecycle, and added AI where it genuinely helped people rather than where it just looked impressive.
- Built the design system and prototypes in Figma so engineers could build straight from them. This cut down on rework and kept the product consistent as it grew.
- Used AI tools like Cursor, v0, Lovable, Claude, and ChatGPT throughout the process, which sped up the design-to-build cycle and let us test ideas with stakeholders much earlier.

UI/UX Designer

July 2022 – November 2024

Divum Corporate Services Pvt Ltd — Bangalore, Karnataka

- Designed the Bosch Marketplace e-commerce platform, covering both the buyer and seller flows along with a set of CX dashboards built around what each type of user actually needed.
- Built Aditya Birla Group's internal AI platform from scratch, swapping a slow manual research process for something faster and more structured that helped executives get to decisions quicker.
- Designed the Isansys portable ECG monitoring product for hospital staff, supporting real-time patient tracking and helping cut clinical response times by around 30%.
- Redesigned several of Coal India's operational dashboards. A cleaner information architecture and simpler interactions made them roughly 25% easier to use.
- Designed the Gintaa food delivery experience for delivery partners and admin users, focused on moving orders through the system quickly and cutting down everyday friction.

UI/UX Design Intern

January 2022 – March 2022

S.S Compusoft Pvt Ltd — Jaipur, Rajasthan

- Designed and helped launch an e-commerce platform for a Jaipur-based book retailer. Online sales went up around 30% in the months after it went live.

EDUCATION

Diploma in Advanced Innovation and User Experience Design

August 2023 – September 2024

MIT Institute of Design — Grade: A

B.Sc. in Animation and Multimedia

July 2019 – May 2022

Birla Institute of Technology — CGPA: 8.58/10

CERTIFICATIONS

Google UX Design Certificate • Adobe & NASSCOM UX Foundation • Accenture User Experience
